

## Personalized Health Care National Conference

Presented by The Ohio State University Center for Personalized Health Care

### You are invited to attend

“Translating Science into Personalized Health Care,”

a personalized health care national conference,

October 16-17 at The Ohio State University Biomedical Research Tower

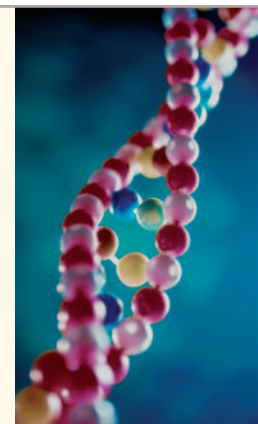

460 W. 12th Ave. Columbus, Ohio.

Platinum Sponsor

The conference will feature internationally renowned speakers in personalized medicine, as well as panel discussions by experts from academia, industry, government and non-profit organizations. Confirmed speakers include Jeffrey Trent, PhD president and CSO, Translational Genomics (TGen); Edison Liu, MD, executive director, Genome Institute of Singapore; Lawrence Lesko, PhD, director, FDA Office of Clinical Pharmacology; Paul Keckley, PhD, executive director, Deloitte Center for Health Care Solutions; Linda Avey, co-founder, 23andMe, Inc.; and many others. Topics will range from research in personalized medicine to clinical applications in patient care.

*CME Credit Available*

## Personalized Health Care National Conference

Personalized health care is emerging as the single most significant development in health care in the 21st century. This development stems from the recent sequencing of the human genome, major technical advances that facilitate our ability to understand the uniqueness of each individual at the molecular level and advances in the field of bioinformatics. This conference will foster opportunities for collaborations and serve as a national platform to discuss the emerging trends and latest developments of personalized health care research and patient care. The Ohio State University Medical Center in partnership with The Ohio State University Comprehensive Cancer Center - James Cancer Hospital and Solove Research Institute and The Ohio State University Center for Personalized Health Care are committed to taking a leadership role in advancing personalized health care in the nation.
